EXPERIENCE

Director of Software Development

2021 - Present

Gozynta, LLC | Remote

Leading a fully remote development team building multiple SaaS products on Google Cloud Platform.

- Implemented a sustainable Kanban software delivery process that enabled Product and Engineering to plan, prioritize, and forecast releases, and improve quality. Shortened the release cadence by 62%, dropped cycle times by 72%, and reduced bug rates by 66% in first half of 2021.
- Remediated all security risks raised by external audit, plus additional static code analysis from Gitlab SAST scans, to successfully publish Mobius into Intuit's QuickBooks App store as of June 2021.
- Modified company-wide behaviors improving communication and reduce distraction fatigue.
- Developed system design and implementation plan for reactive micro-service architecture composed of Kubernetes, Kafka, MongoDB, Python, Flask and Redis.
- Worked with CEO to budget for and recruit new hires, **doubled the team over 3 months** including authoring job descriptions, leading technical interviews, and coordinating onboarding.
- Coached developers in software craftsmanship, pairing, and system design. Led workshops on Reactive systems, Domain Driven Design (DDD), Acceptance Testing (BDD), Continuous Deployment, and held bi-weekly TDD-focused Code Katas.
- Personally implemented and/or contributed to security, performance, monitoring and workflow improvements across platform including CI/CD, Celery, RabbitMQ, MySQL, Kubernetes, & Docker.

Co-Founder

2019 - 2020

Unplugg Enterprises, LLC | Remote

Co-founded this tech startup addressing digital addiction by incentivizing real-world interactions.

- Created and held user experience interviews to identify and understand user pain points.
- Developed web and mobile prototypes as we iterated on ideas using many technologies, such as geo-tagging, push notifications, Dart, Flutter, Swift, Elm, AWS AppSync, DynamoDB, and GraphQL

Senior Software Engineering Manager

2018 - 2019

Gerber Technology | Tolland, CT

- Implemented Scrum in a 50-person org including backlog planning and entrance/exit ceremonies; yielded an **86% decrease in defects** and **tripling on-time completion of roadmap goals**.
- Advanced and coached two senior software engineers to their first team lead roles to provide technical guidance and oversight to two teams of 6-8 people, including FTEs and offshore contractors.
- Onboarded 12 software engineers via acquisition, and developed collaborative relationships between the two remote teams by assigning shared responsibilities and upholding accountability.
- Led projects to modernize 2D/3D PDS Platform (C++, Python, JS) including migration to Git, and integration of AWS cloud services, and Alvanon's Digital Avatar platform.

Software Development Manager

2016 - 2018

Sailpoint Technologies | Austin, TX

- Scrum master for two 8-person cross-functional teams; delivered new MFA provider integrations, REST & SCIM APIs using Java Spring, and front-end redesign in Angular.
- Supported professional development goals of 8 directs using regular one-on-ones & yearly reviews.
- Established new vendor relationship for delivery and integration of localization assets in 4 languages.

Software Engineering Manager

2012 - 2016

Caradigm USA, LLC | Remote

- Delivered two new products to market with 8-person teams as architect, lead developer and scrum master, including Linux ThinClient integration and Identity Governance/Data Warehouse solution.
- Earned *Caradigm Employee Recognition Award* for improving customer satisfaction scores.
- **Reversed underperformance** of globally distributed team, began meeting all SLAs within 3 months.
- Delivered 50 releases with 6-person offshore team over 12 months across 4 LOBs using Kanban.
- Personally implemented portions of Single Page Application (Knockout.js), Python, REST APIs (C# WebAPI, Java Spring), SQL Server, SSIS, CI pipeline (TFS), Unit and Integration (Selenium) tests.

Software Development Engineer II

2010 - 2012

Microsoft Corporation | Remote

- Designed, planned, and led 5-person team in platform migration from Java monolith to a globalized, service-based architecture in C#/.NET using WCF, WPF, and REST APIs.
- Influenced decisions on platform libraries that simplified configuration and enabled test automation.

Senior Software Engineer

1999 - 2010

Sentillion Inc. | Andover, MA

- Developed Linux and Windows services, clients and SOAP APIs in Java, C#, JavaScript, Perl, Bash.
- Increased platform reliability and manageability of servers in our distributed Linux cluster, significantly reducing costs for the Engineering and Support organizations.

COMMUNITY & VOLUNTEERING

The Master's School | West Simsbury, CT

2014 - 2015

Facilitated a Software Programming elective for High School students.

YMCA of Greater Hartford | Granby, CT

2008 - 2014

USA Swim Official

EDUCATION

Daniel Webster College | Nashua, NH

Bachelor of Science in Management and Information Technology

SKILLS

Servant Leadership, Project Management, Continuous Delivery, Software Craftsmanship
