

ANDREW A HAMLIN

(860) 810 - 6538

aahamlin@gmail.com

<https://aahamlin.github.io>

I strive to build highly engaged, productive teams who deliver well-crafted products. My teams have built industry-leading solutions, as recognized by Gartner and KLAS. As a leader, I have remotely managed globally distributed teams, driven SDLC changes, successfully led turn-arounds of under-performing teams.

Two of my favorite questions are “what is the simplest thing that could work?” and “how did you test this [programmatically]?”

WORK EXPERIENCE

Senior Software Development Manager

Gerber Technology, LLC

03/2018 – Present

Currently facilitating a shift from Waterfall to Agile delivery including tools and process changes, such as continuous integration and sprint planning. Developing engineering KPIs and dashboards to plan reliably, coordinate distributed teams, and identify risks. Scrum master of 2 teams. Coaching teams on Agile (Epic/Story/Task) design process incl. team estimation and code reviews. Responsible for recruitment, hiring and contingent staffing. Implemented user interface changes in C#, WPF and Python.

Software Development Manager

SailPoint Technologies

12/2016 – 02/2018

Collaborated with peer managers to establish best practices including updated design tenants and automated test approaches. Developed scripts to simplify project management. Championed refactoring of test suites to improve reliability and scalability in CI/CD environment. Provided career guidance to 8 direct reports. Advanced engineers' skill sets by establishing mentorships within the team. Scrum

master of 2 teams. Established new business process with translation vendor and added 4 new languages.

Development Manager/Team Lead
